

LAUNDRY VENDING MACHINE

- Superior quality, thicker metal than the competitive machines.
- Full Plexiglass plate over the front to display product and point of sale information.
- 2 cylinder locks, plus built in security hasps to receive padlocks
- White, contemporary color, powder coated for durability.
- Superior design, patent pending, with columns mounted on the door for easy loading.
- Stainless Steel chute for durability and performance
- Adjustable columns accept all box sizes.
- Locking coin box

This is the best laundry vender on the market today. They are constantly working to improve the quality of this vender while incorporating many important features into their products.

MODEL 224

2 Column / 46 Box Capacity

Pricing set at 75¢ and can be increased in 25¢ increments to \$1.25

Cabinet Dimensions: 13½" W x 38¼" H x 10" D

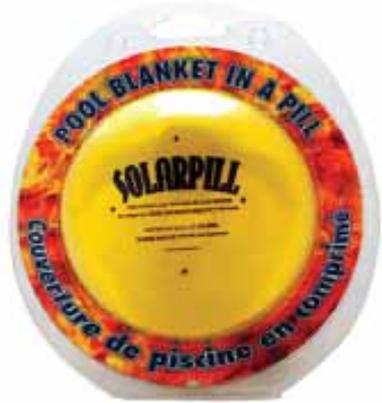

Comp No.: E.9571.....\$399.00/ea.

POOL BLANKET IN A PILL

Saltwater Compatible

- Prevents Pool Water Evaporation and Heat Loss with an Invisible Layer of Non-Toxic, Biodegradable Film
- The Solar Pill will be empty after 1-2 days in the skimmer. Once empty you can remove the Solar Pill and enjoy its effects for up to 30 days
- Inhibits pool water heat loss 24 hours a day
- Works at approximately 60% the effectiveness of a conventional plastic solar blanket, at a fraction of the cost and effort
- Simply place the Solar Pill in the pool skimmer basket and enjoy warmer pool water for up to 30 days
- Patented Time-Release Delivery System for Complete Coverage
- Will NOT be affected by Automatic Pool Cleaners

Swimming pools lose energy in different ways, but evaporation is easily the most significant cause. Evaporating water requires a lot of energy. It only takes 1 BTU to raise 1 pound of water 1 degree, but each pound of water that evaporates takes 1,048 BTU's of heat out of the pool.

Blanketing your pool when it's not in use is the most effective way to reduce pool heating costs. Savings of 50-70% are possible; but taking a cover on and off all the time is a hassle. The SolarPill is 100% easier to use. This product may help qualify for LEED WE points.

AP72 For Pools up to 30,000 Gallons

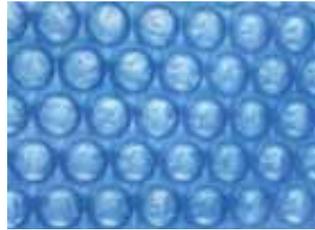

Use multiple SolarPills for larger applications

Stock No.: AP72.....\$15.95 /ea

FLOATING SPA & POOL COVERS

Floating spa and pool solar blanket covers use the energy of the sun to raise the heat of your spa water temperature by 10 degrees or more in season. Solar blankets will save you money by cutting your heating costs, reducing your water evaporation by 90% (thus saving you chlorine and chemical costs) and help keep your water cleaner. Can easily be cut to fit irregularly shaped spas and pools. This product may qualify for LEED WE points.

FYI

SOLAR COVER BENEFITS...

- Cuts heating bills up to 70%
- Reduces water evaporation up to 90%
- Cuts chemical consumption
- Raises water temperature at least 10 degrees with full sun exposure

INTELLIBRITE – White LED

Assure the purest and whitest illumination in your commercial water with the IntelliBrite® White LED. With an array of 32 LEDs, an equivalent of 500 watts of incandescent light, the commercial IntelliBrite White LED enhances the beauty of commercial water features, water theme parks and municipal pools. Energy-conscious LED offers conservative power consumption with powerful illumination. Let IntelliBrite White LED commercial lighting systems delight evening swimmers.

- IntelliBrite White LED uses 70 watts to create the same light output as a 500 watt incandescent light bulb. That's 86% less energy used!
- The brightest white LED pool light on the market.
- Superior lens geometry and exclusive reflector design combine to create a wider beam and more uniform light distribution.
- Independent LEDs stay individually illuminated.
- LED technology provides longer life.
- Solid-state technology with no internal filament.
- Compatible with Pentair stainless steel and plastic niches and perfect replacements for Amerilite and Sam light.

120 Volt with 50' Cord

120 Volt with 100' Cord
Comp No.: 600112.....\$629.00 /ea.

**INTELLIFLO VS+SVRS
Intelligent Variable Speed Pump**

The ONLY way to comply with new federal anti-body entrapment standards and save money. There's simply no better way to add a Safety Vacuum Release System (SVRS) to your public pool or spa than with the new IntelliFlo® VS+SVRS pump. It helps prevent suction entrapment and also provides value that no other solution can. While other safety solutions represent an added cost, IntelliFlo is an investment that may potentially save thousands of dollars in energy costs over its long life.

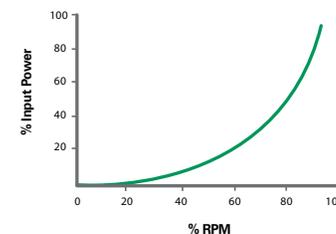

- Replaces 3HP or smaller pumps
- Meets ASME A112.19.17.2002 standards for anti-body entrapment protection
- Onboard intelligence detects blockage and automatically shuts pump off within seconds
- Exclusive breakthrough motor technology provides energy savings while being safety compliant
- 8 settable, changeable speeds ranging from 1100 to 3450 RPMs
- NSF certified and UL and ETL Listed 230 Volt

230 Volt IntelliFlo
Comp No.: 011017.....\$1,199.00 /ea.

Here's just one comparative example:

Pump	Annual Kilowatts Use @ 24 hr/day Run Time	Annual Electric Cost @ \$0.15	Savings Difference*
IntelliFlovs/svrs	9,654	\$1,448	\$1,443 or 50%

Pump Motor Speed vs. Power Consumption

This graph shows the huge increase in energy consumption as pump speed increases. Slow down the pump and you cut energy costs dramatically.

*Actual savings may vary based on plumbing size and length, pump model, service factor, and other hydraulic factors. Example reflects savings for an average 30,000 gallon commercial pool operating 24 hours per day at a flow rate sufficient to perform a minimum 6 hour turnover.
